

Specialty Contracting & Waste Management

# UTILITIES

## Storm/Sanitary Sewer and Water Main Installation

### Quality workmanship

Whether you're installing water and sewer lines for new construction – or just need damaged lines repaired – turn to the utility pros at Veit. We also can combine site utilities with mass grading and site demolition for efficient, single-source sitework.

Veit has earned a reputation for quality workmanship with municipalities and contractors throughout the Midwest. And we have one of the best safety records in the industry.

### Responsive professionals

Sewer and water main installations require careful sequencing and professional project management. We'll come through for you. With a large inventory of diverse pipe sizes, advanced excavation equipment and well-trained crews, we're prepared to start immediately. We'll keep your project on schedule too, and take care not to disrupt the work of other trades on site.

When the work is done, Veit will use its video guidance and inspection system for fast – and safe – commissioning.

Veit can safely install utilities near highly sensitive areas – and we're just as careful not to disrupt the work of other trades on your project site.
