# MINNESOTA LANDFILLS

## Waste Management

With four convenient locations across Minnesota, you won't waste fuel getting to one of Veit's fully-permitted landfill facilities. And you won't waste time waiting to unload, either: Veit landfills are professionally managed and well staffed.

### Good environmental stewards

Located in Austin, Becker, Duluth, and Hibbing, Minnesota, all Veit landfill operations comply with the Minnesota Pollution Control Agency regulations as well as all local, county and state regulations. Our excellent environmental and safety record is your assurance of reduced risk.

### End-to-end waste management

In addition to our four landfills, Veit offers roll-off container delivery, waste hauling, and four recycling and transfer facilities. Our turnkey waste management services help you manage your waste stream responsibly — and earn waste recycling points. Veit has one of the region's highest recycling rates.

Whether you're a self-hauler or working a construction jobsite, you'll find one of Veit's four Minnesota landfill operations convenient, efficient and affordable.

Serving direct haulers, end dumps, or walking floor trailers, Veit's landfills are convenient, efficient, and affordable.

### Acceptable Waste

Veit's four landfills accept most non-hazardous waste (including non-hazardous soils), as approved by the MPCA according to the Industrial Solid Waste Management Plan. We also accept waste building material from construction projects and road repairs; please call landfill for details.

- Asbestos Materials (both friable and nonfriable, except at Austin landfill)

## Veit Green

Veit strives to be a good environmental steward. We build and operate our landfills to exceed current local, state, and federal environmental regulations. As a member of the U.S. Green Building Council, Veit can also help customers achieve waste recycling points towards LEED certification of their green building.

Veit continues to work closely with the Minnesota Pollution Control Agency and other organizations to anticipate changing practices and regulations.
