# VONCO II LANDFILL AND RECYCLING FACILITY

## Waste Management

Get in, get out, and get back on the road fast at the Vonco II landfill. Veit's immaculate, fully-permitted construction and debris landfill and recycling facility is an affordable, efficient operation.

Vonco II is designed and managed to make every step of waste and contaminated soil disposal, tracking, and recycling easier on you — and the environment. We even have an onsite sand and gravel operation, so you can leave with a backhaul of aggregate.

### Extra green

Veit is proud of both its environmental and safety record. Our Vonco II landfill operations exceed state, federal, and local regulations, and even incorporate "extra green" measures like an additional liner, closed loop leachate collection system, and more.

### Recycling services

Vonco II also features onsite recycling services, so you can manage your waste stream responsibly — and earn waste recycling points. We have one of the region's highest recycling rates.

Just 30 minutes northwest of Minneapolis, Vonco II is a fully-permitted construction and demolition debris landfill with onsite recycling and aggregate operations. Serving direct haul volumes and walking floor trailers.

### Acceptable Waste

#### Demolition debris, including:

- Asbestos Materials (friable and nonfriable)
- Asphalt
- Brick
- Concrete
- Conduit
- Glass

## Veit Green

*Veit strives to be a good environmental steward. We build and operate our landfills to exceed current local, state, and federal environmental regulations. As a member of the U.S. Green Building Council, Veit can also help customers achieve waste recycling points towards LEED certification of their green building.*

*Veit continues to work closely with the Minnesota Pollution Control Agency and other organizations to anticipate changing practices and regulations.*
