DEMOLITION

High-Reach Backhoe

Efficient, high-level control

The crane-and-wrecking ball method is tried and true for a typical high-level demolition project. But what if you're tearing down a high rise, working in a tight space, or need a more controlled demolition process? Problem solved: introducing Veit's high-reach backhoe.

With the high-reach backhoe, even the most challenging high-level demolitions are simplified. Just drive directly into the site, extend the boom and activate your choice of demolition attachment tools. It's an efficient, controlled demolition alternative that saves your schedule and your budget.

Heights exceeding 125 feet

Veit's high-reach backhoe is an impressive, state-of-the-art machine – the first of its kind in the area. The stable Caterpillar base is outfitted with a specialized boom that can reach heights of 125 feet or more: ideal for demolition at high levels and in tight spaces.

Compact, stable and safe

The high-reach backhoe requires less ground space than a traditional crane. It's also more versatile, capable of performing multiple actions including precise metal shearing – all with minimal vibration. And the boom end is equipped with a high-pressure dust suppression system, eliminating the hazards of a worker in an aerial lift.

For a safer, more efficient and controlled demolition at high levels or in tight spaces, specify Veit's high-reach backhoe.

Height, versatility and control

- **Easily reach heights of 125+ feet**
– Efficiently demolish silos, high rises, and more.
- **Stay in control with versatile attachments**
– Quickly swap out crushers, pulverizers, shears, multi-purpose jaws, grapples, and hydraulic hammers for efficient demolition of wood, concrete, steel structures and more.
- **Drive in and begin**
– With its stable Caterpillar base and high-reach capability, there's no need to build a work platform.
- **Compact design for tight spaces**
– The small footprint offers excellent maneuverability.
- **Minimize vibration, dust, and impact**
– Site restrictions? No problem.
- **Run a safer work site**
– Built-in dust suppression system eliminates the fall hazards of a worker in an aerial lift.

Veit's high-reach backhoe attachment can extend in excess of 125 feet, for quick and controlled high-level demolition.
