# FOUNDATIONS

## Driven and Drilled Piles/Drilled Piers

### The deep foundation experts

When your construction site has soft soil conditions, turn to the experienced problem solvers at Veit.

Veit brings 40 years' foundation experience to your project.

We offer a variety of piles and piers, and use proven methods and materials matched to your specific site needs. Veit's fleet of pile-driving equipment includes vibratory and impact hammers capable of achieving high-capacity piles to minimize deep foundation costs. And Veit's professional project managers will keep your project on schedule.

### Proven solutions

We'll work closely with you and your engineering team, recommending the best solution for your soil, site, structure – and budget. On vibration-sensitive sites, Veit can use its auger cast pile to minimize surface vibration and impact to adjacent structures. Concerns with cobbles and boulders? No problem! Our downhole hammer can efficiently drill in these difficult conditions, keeping your project on time and on budget.

In less than three months, Veit installed 22 miles of H-piles for this power plant project.

Count on Veit for effective and affordable foundation solutions.

### Driven Piles

- H-Piles
- Pipe piles
- Wood piles
- Steel and vinyl sheets

### Drilled Piles/Piers

- Foundation piles
- Retention piles
- Foundation piers
- Secant walls

This casino site was filled with cobbles and boulders, but Veit's downhole hammer technology kept the project on schedule.

Using our downhole hammer for this highway project, Veit achieved precise retaining wall alignment despite cobbled and boulder-laden soils.

### Contracting

- Earthwork
- Demolition
- Utilities
- Foundations
- Environmental Remediation
- Industrial Cleaning

### Waste Management

- Roll-off Containers
- Construction & Demolition
- Debris Landfills
- Recycling & Transfer Facilities
- Waste Hauling
